

# Business Port™ *Integrated Business Management System*

Regardless of industry sector, Managing Process, Documents, Risks & Compliance in one Integrated System makes complete sense !

# Time for Change

We help companies transform their document heavy management systems into digital, process-based frameworks that simplifies content, provides clarity of responsibilities, and standardises processes to drive best practise across the organisation.

**The Agility System** combines powerful elements to control Process, Documents, Risk & Compliance. With ISO 9001:2015 advocating the Process-based approach with integrated Risk, the traditional Management System is unable to cope with the new demands.

## Time For A New Integrated Model

The system improves communication, collaboration & knowledge sharing, resulting in more efficient work routines and improved coordination of activities between disciplines and departments.

The Business Management System software provides the combination of Improving Process Performance while maintaining Compliance. Users can map their Processes quickly & effectively increasing accountability and ownership.

### Graphical Navigation

Allows for information to be delivered to users in a focused manner based on their location, including regions, offices, remote sites, projects or initiatives.

### Visual Swim-lane Maps

Create Visual Swim-lane Process Maps in minutes & send for approval via automated Document Review functionality. Quick to build and 10x faster than using Visio or Sharepoint.

### Workflow

Automated Process removes duplication, reduces paper-handling, and maximises efficiencies in a repeatable, measurable manner, saving costs and guaranteeing compliance.

### Mobile Friendly

Access Everywhere – from Audits, Inspections, Incident Reporting, and other QHSE data gathering, our QHSE Modules are mobile friendly to facilitate automatic reporting and link to Performance Dashboards.

### Performance Dashboard

Real-time performance is achieved through dashboards that can be customised to the organisational KPI's and departmental objectives to influence decision making.

### QHSE Modules

Tailored Modules in hours, not weeks! We offer 5 Modules initially – Audit & CA, NCR, Training & Competency, HAZOP, Incident Management. Each module has performance measured and KPI's reposted automatically.

## Transformation from legacy to Digital simplifies the complex!

- Create graphical Swim-Lane Process Maps quickly, then approve via automated workflow
- Save administration time with workflow managing full document life cycle (draft to archive)
- Instant access to the right document through Graphical Navigation using Business Models & 'End to End' Process Overviews
- Manage Multi-Standards via the Compliance Navigator to increase visibility of responsibilities...no more "Oh I didn't know that"
- Comply with 'Integrated Risk Controls within Process Maps' ( as per ISO 9001:2015)
- Help your employees to understand their individual Roles & Responsibilities
- Promote innovation, collaboration and continuous improvement within your workforce

“ Babcock in Rosyth has worked closely with Agility Systems for over a decade now. In that time the company has helped Babcock grow into what is now a FTSE 100 organisation. Recent benchmarking facilitated by our IT function of the global management system provision market has confirmed that Agility is a class leading solution.

### Babcock Quality Manager

“ Agility has given us the stability needed within our daily operations. We required an element of control over our processes and we achieve that with Agility Systems.

HSQE Divisional Manager at Siemens

# Agility System Overview

Both global corporates and SME's are now benefiting from reduced costs and improved Customer engagement by transforming the cumbersome legacy content through the adoption of a Process-based approach.

While the traditional QHSE systems were isolated from Process Improvement, the software ensures Compliance is maintained while Processes can be optimised to deliver maximum efficiencies over the longer term to add significant value to the bottom line.

If your existing system contains large numbers of documents, random flowcharts and spreadsheets, the Agility System will centralise your information, simplify content and remove the excessive costs of system maintenance.

## Our Clients

It's a fact, we help organisations transform from the traditional format of text documents & flat Visio maps into a Business Management System that provides digitised Process to improve Operational Performance & maintain Compliance.

For more information or if you would like a **30 minute Web Demo**, we would be pleased to hear from you.
